Student Grade Gouache Paint  
12 ml/.4oz. Tube  
Set 12 Pcs.

## Artist Grade Paints

Created for the true artist. These are premium quality, highly pigmented, professional grade paints.

## Gouache Paint

Opaque water-based paints. Versatile and easy to use. It combines the qualities of watercolor and acrylic paints. Gouache dries quickly, with a matte finish. Gouache is reworkable. Because it is water-soluble, a wet brush can go back to soften edges or lift colour even after the paint dries. Non-toxic, conforms to ASTM: D-4236

## Brush Hairs and Bristles

**Synthetic:** Economical and versatile options for all painting mediums. Most synthetic brush manufacturers will combine synthetic bristles with animal bristles so you get the best of both worlds. Avoid cheap synthetic brushes as they are not durable and lose shape quickly.

**Hog:** Stiff, springy and economical. Hog hair brushes tend to do most of the heavy lifting in oil painting due to their durability and stiffness. Use hog hair brushes for general oil painting work, but not so much for the finer details.

**Sable:** Not actually made from sable hair but rather from the tail of a species of mink (a member of the weasel family) found in North-Eastern China and Siberia. Sable brushes are extremely fine, springy and hold lots of water, making them perfect for watercolor painting and fine oil/acrylic painting.

**Camel:** Very soft hair with little snap due to a lack of resistance. Often made of squirrel, goat, ox, pony or a combination. Camel hair is suitable for watercolor painting, inking and any other low-resistance mediums.

# EXCURSION SERIES - BETTER

## Brush Shapes

- Choose the best hair for your media.
- Choose the best brush for the project.
- Know what each brush is made for.
- Find the brushes that are right for you.

Round: pointed tip, long closely arranged bristles for detail.

Flat: for spreading paint quickly and evenly over a surface.

Bright: Flat brushes with short stiff bristles (shorter than flats). Brights are good for working on textured surfaces, by filling in the gaps.

Filbert: flat brushes with rounded tops. They allow good coverage and the ability to perform some detail work.

Fan: for blending broad areas of paint or creating textured looks. Often used to create feathered edges.

Angle: like the filbert, these are versatile and can be applied in both general painting application as well as some detail work.

Mop: a larger format brush with a rounded edge for broad soft paint application.

Rigger: round brushes with longish hairs, traditionally used for painting the rigging in pictures of ships. They are useful for fine lines and are versatile for both oils and watercolors.

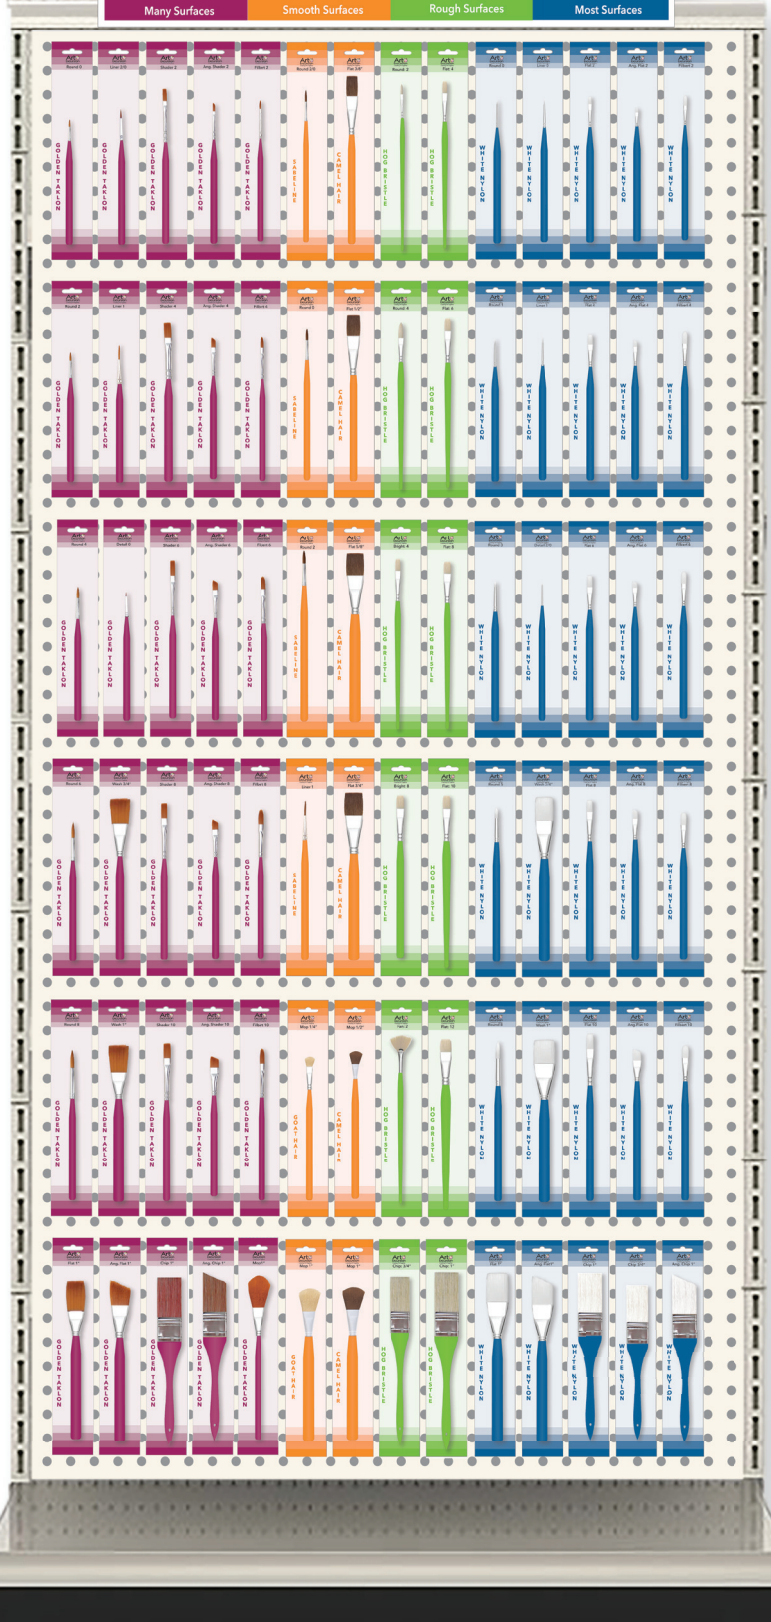

Liner: elongated rounds. Liners are used for small or detailed work.

Wash: a square end with medium to long hairs. This brush gives maximum coverage smoothly and quickly because it's thicker than any other brushes. It gives nice bold strokes and its edge can be used to create fine lines, straight edges, and stripes.

## Pattern & Novelty Chalk

- Bold patterns printed on the surface
- Round Chalk Size 0.98" diameter X 4.13"
- Washable and Non Toxic

### HOW TO CLEAN CHALK OFF SIDEWALKS/DRIVEWAYS

Sidewalk Chalk is created for use with concrete, pavement or asphalt sidewalks and driveways. Test before using on a large area. Wash off to make sure chalk does not stain surface.

### FOR BEST RESULTS:

1. Wash surface with water pressure from garden hose to remove as much chalk as possible.
2. Brush surface with broom or stiff brush to remove excess chalk.
3. Rinse
4. Rub any remaining chalk with a sponge and mildly abrasive liquid detergent.
5. Repeat as necessary.

**STAIN ADVISEMENT:** Chalk contains colorants that may stain clothing and other surfaces.
